

Case Study: ESG Integration, Reporting, and Capability Building in an Oil & Gas Client by ESG Disclose

Enabling our clients to make sustainable decisions

Introduction

A major oil and gas client (*For confidentiality reasons, the name of the client has been made anonymous*) collaborated with ESG Disclose to enhance their Environmental, Social, and Governance (ESG) practices, focusing on Scope 3 carbon emissions. This partnership led to significant improvements in their ESG practices, reporting accuracy, and overall sustainability performance.

Challenges

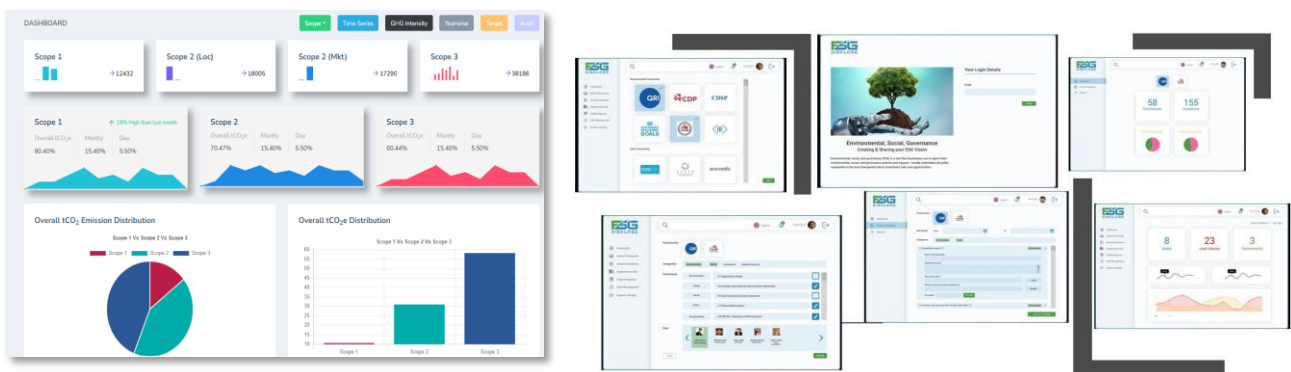

The client faced several critical challenges in their ESG journey:

1. **Scope 3 Carbon Emissions Measurement:** Difficulty in accurately measuring and reporting indirect emissions from their value chain.
2. **Data Integration and Management:** Challenges in integrating ESG data collection and management across global operations.
3. **Regulatory Compliance:** Struggled to meet evolving regulatory and stakeholder demands for transparent and comprehensive ESG reporting.

Solutions Provided by ESG Disclose

ESG Disclose addressed these challenges through a multi-faceted approach, combining advanced software solutions, comprehensive training, and an in-depth ESG readiness assessment.

1. **Advanced AI powered Reporting Software:** ESG Disclose deployed its cutting-edge SaaS platform, Carbon Ledger, which provided robust solutions for ESG data collection, management, and reporting. This platform offered real-time data analytics, automated report generation, and compliance tracking, minimising manual efforts and enhancing accuracy.
- 2.

3. **Training and Capability Building:** ESG Disclose conducted extensive training programs tailored to the client's needs:
- 4.

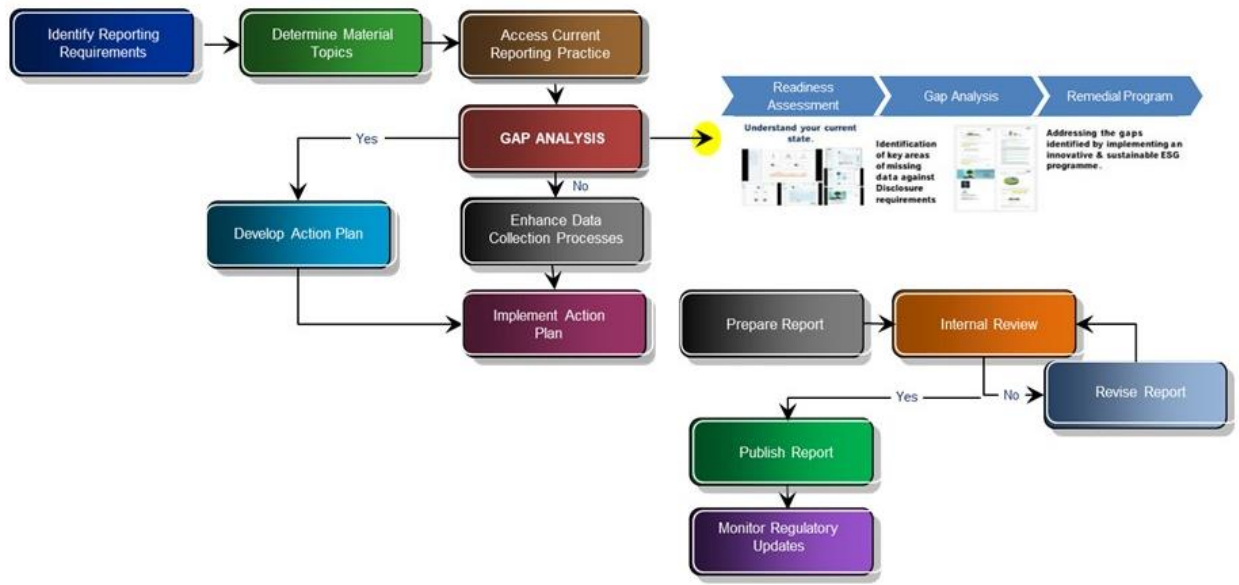

Examples of ESG Capability Building Solutions

- **Workshops on ESG Fundamentals:** Educating staff on ESG principles and best practices.
- **Specialised Training on Scope 3 Emissions:** Detailed sessions on measuring, accounting, and mitigating Scope 3 emissions.
- **Continuous Learning Modules:** Ongoing education to keep the team updated with the latest ESG trends and regulatory changes.

5. **ESG Readiness Assessment:** An initial comprehensive assessment identified gaps and opportunities in the client's existing ESG practices, informing the development of a customised improvement roadmap.

Overview - ESG-D Readiness Assessment Process

Project Approach and Roadmap

Enhanced Solution Details

Drawing from the uploaded presentation, ESG Disclose further enhanced the solution with the following features:

1. **Greenhouse Gas Identification and Quantification:** The Carbon Ledger SaaS platform facilitated the identification and quantification of greenhouse gases such as CO₂, CH₄, and N₂O from various organisational activities, converting them into carbon equivalents (CO₂e) for a comprehensive emissions assessment.
2. **Real-Time Monitoring and Alerts:** Enabled real-time monitoring and alerts for prompt identification of deviations from sustainability goals, ensuring proactive decision-making.
3. **Scalable and Customisable Features:** The SaaS solution was designed to be scalable and customisable, allowing the client to adapt dashboards and reporting features as their ESG reporting needs evolved.

Results and ROI

The collaboration with ESG Disclose yielded substantial benefits, transforming the client's ESG practices:

1. **Enhanced ESG Reporting:** Achieved precise and transparent reporting of Scope 3 emissions, improving stakeholder trust and satisfaction.
2. **Operational Efficiency and Cost Savings:** Streamlined data collection and management processes resulted in significant operational efficiencies and cost savings. Automation of reporting tasks reduced manual effort and errors.
3. **Regulatory Compliance:** Successfully met all relevant ESG regulatory requirements, mitigating the risk of penalties and enhancing market reputation.
4. **Top Line Growth:** Improved ESG practices opened new avenues for investment and partnerships, driving business growth. The client's commitment to ESG attracted environmentally conscious investors and partners, providing a competitive edge.
5. **Social and Governance Improvements:** The comprehensive ESG framework supported broader social and governance goals, including better labour practices, enhanced corporate governance structures, and improved community relations.

Conclusion

The partnership with ESG Disclose enabled the anonymous oil and gas client to comprehensively transform their ESG practices. The deployment of advanced software solutions, extensive training, and a structured implementation approach led to significant improvements in ESG reporting, compliance, and overall business performance. This case study illustrates the potential of robust ESG practices in driving business value and sustainability.
